Virgo

Rat

Few could have imagined how that little redhead, clinging to the side of his mother, would look in the pilot's seat of an Apache helicopter. But like his older brother, Harry chose a path of service and chivalry that speaks volumes of his character. Senior officers have indicated that he could go as far as he wants to in the military—but is this really Harry's destiny, or will

things take a different turn? The stars above can go a long way in answering this, as well as the most lingering question of all: Will he find true love?

His Royal Highness Prince Henry Charles Albert David of Wales was born under the sign of **Virgo** on 17th September, 1984, in Paddington. Virgo children are among the most **curious** and eager to learn, with an unusual appreciation for beauty

and **order**. Entering the world as royalty is arguably perfect for these personality traits, and the young prince would have delighted in the rich texture and complexity of the privileged world around him.

However, Virgo wasn't the only force at work. Harry's position in the Chinese zodiac is that of **Rat**, which is known for its aggression, **rascality**, and private inner-world. It wasn't long before the second-

“ You’ve got to give something back. ”

born was wreaking playful havoc inside the palace and sticking his tongue out at members of the press. The Rat is full of life, with a **sharp intellect** and a propensity toward strong opinions—such that, despite all carefree appearances, Harry would have carefully surveyed the world around him from an early age, and developed his outlook accordingly.

The death of his mother at such an early age was an earth-shattering experience for Prince Harry, whose **Virgoan innocence** brought him especially close to the radiant maternal figure in his life. The fact that

she herself was beloved throughout the world would have made the separation even more traumatic, and driven Harry further toward the expression of his more cynical and calculating Rat nature.

Indeed, during his formidable years, Harry's Virgoan tendency to do things in a proper and orderly fashion seems to have played second fiddle to the Rat, who insists on **breaking free** and doing things its own way. Much to the chagrin of the royal family, the Prince did plenty of living in the moment, landing him on the cover of tabloids across the world. The considerable shadow of his older brother William, along with the constant pressure of the media, would have fueled the fire of rebellion.

However, as these Rat energies played out, Harry's Virgoan traits began to regroup. Virgo is an excellent sign for the discipline and precision of a **military career**, and Harry needed a way to prove himself to a world that had not only given him every privilege, but also every scrutiny. The Blues and Royals offered a perfect chance to make his own way and **earn** his favour in the British psyche. The Rat can sometimes become complacent when the world is presented on a silver platter, but Virgo is driven to participate,

succeed, and understand the true nature of things, no matter what the circumstances.

This takes us to the present day, where the mischievous young Prince has transformed himself into a decorated soldier, attack-helicopter pilot, and public servant with more visibility than ever. What could possibly be missing from this picture?

Harry's Sun (Virgo), Moon (Taurus) and ascendant (Capricorn) are all **earth signs**, suggesting that he doesn't take relationships lightly, and will not settle down until he is **absolutely sure**. Harry is unlikely to get carried away by exciting visions of romance, as both his Western and Chinese signs favour a careful, long-term assessment of any potential mate. Furthermore, he is unlikely to have resolved all of the **emotional trauma** caused by early separation from his mother Diana, the first and foremost woman in his life. In all likelihood, this unresolved energy will continue to manifest in his relationships with women until the trauma is completely healed.

Of course, the greatest risk of waiting for perfect, ideal love is that such a person may never actually appear, resulting in compromise and bitter disappointment. As Harry continues to

mature and enjoy his new stature as an accomplished nobleman, his Rat energies may take the lead again and move him toward the lifestyle of an international playboy. The dashing looks and brawny nature will make this path even more inviting, and the desire to find a perfect mate could result in a series of shallow relationships. In the end though, his grounded, earthy nature will blossom. Look for a love match in next **2-3 years**, when Prince Harry's stars finally align for long-term commitment.

Aries (Mar 21 - Apr 19)

In order to love someone else, ask whether you have really been loving yourself. If the answer is no, all you have to do is take time out and listen to the small voices within. Once you bring this heightened level of self-respect to that new or existing relationship, doors open that you didn't even know were there. After the 17th, something returns to you that has been missing. This may be true in a literal sense, but it will almost certainly be true in a spiritual, psychic sense. The return of this dormant power puts you in touch with your highest ambitions, and as such, you will find that certain behaviours and habits no longer fit.

Taurus (Apr 20 - May 20)

Make sure you walk your talk with partners and close friends this month, because you'll definitely be called out for not doing so, in which case things are likely to get heated! The good news is, if you're in a relationship, there is somewhere else to channel this energy after dark. On personal and financial frontiers, a significant new opportunity is ripening, but strong emotions from a third party are slowing things down. Seemingly disparate situations are more closely related than you think—finding the truth requires intuition and creativity. Fortunately you'll have plenty of that, provided you stick to a healthy routine and drink plenty of water.

Gemini (May 21 - June 21)

It's hard to measure how much responsibility has been heaped on you lately, since there hasn't been anything else in the way of comparison. Don't plan on slowing down yet, because you're in for another fast-paced month, with plenty to keep you tied up. On the one hand, the chances of kindling a new flame are high in these conditions—but on the other, existing relationships will have some kinks to work out. You personally will have to carve out time for rest and relaxation, and commit to it just like any other appointment. Look for a way to breathe life into that stagnant situation with a friend. Nobody's perfect, but that's the beauty of it.

Horoscopes **September 2012**

Pluto turns direct while Saturn prepares to exit Libra, setting the stage for long-term change.

Call **0800 422 0422** for more details

Libra (Sept 23 - Oct 22)

Are the best things in life really free? At times this seems like an empty saying, even in terms of love—but the idea that you must earn the love and respect of people around you may be limiting your ability to give and receive freely. Once you realise that you deserve love just for being who you are, it comes to you in spades. You don't have to work or struggle or perfect yourself—that's what makes it love. Pay close attention to your health this month, as you will find things falling into place when you keep up a wholesome routine. When the temptation arises to fix someone else's problems, put yourself in their shoes before offering advice.

Scorpio (Oct 23 - Nov 21)

When Mars hangs out in your sign, as is the case all this month, the effect is quite noticeable. Your emotions, desires and passions are running on overdrive, and you'll definitely need ways to cool down and slow the pace. On the plus side, you have a virtually endless supply of creative energy at your disposal. What you do with it is entirely up to you, but a word of caution—you will be in the right on several occasions, but if you let your emotions get the best of you, the scales will end up tipped the other way. Little diversions, a movie here and a walk in the park there, go a long way toward keeping mental balance.

Sagittarius (Nov 22 - Dec 21)

Sometimes actions say it all, but right now things need a little verbal coaxing. Important contributions are liable to go unnoticed unless you drop subtle reminders that you are going the extra mile. In the realm of love and relationships, an emotional issue from you past is hampering your ability to swim into open waters and mingle with all those new fish. No problem—the moment you look at the problem honestly, you'll find yourself able to separate fact from fiction and move on. A lingering financial issue finally takes a turn toward resolution around the 17th. Expect things to smooth out after a few final bumps in the road.

Cancer (June 22 - July 22)

An emotional need to explore the outside world contradicts a deep spiritual need for inner

silence. Can you do both at once? Yes—the trick is to go places and do things that stimulate your mind while leaving room for inner-silence. Volunteer work in a new place, for example, is hugely beneficial. The search for love has been tedious, more like a chore than anything, but this changes next month. Now is the time set your own house in order, and bring all of your inner software up to date. Something unwanted has recently resurfaced from the past, but it is on its way out now, never to return. It's time to embrace the new.

Leo (July 23 - Aug 22)

You are emanating a certain power that makes people want to do things for you. What's wrong

with that, you might ask? Nothing at all—unless manipulation comes into the picture. But you would never do a thing like that, Leo. As long as you keep it real and allow people to come to you, no harm will come of this extra bit of razzle-dazzle you're carrying around. If love is on your agenda, you'll find an interesting connection between your ability to focus on others, and someone's romantic focus on you. There is nothing sexier than someone who gives and receives with concern for the greater good.

Virgo (Aug 23 - Sep 22)

Hopefully you're looking for love, because if not, you're going to have your work cut out for you! The

stars are aligned for something sudden and steamy—and perhaps deep at the same time. If you are already committed, you'll want to channel this energy into your partner and fall in love all over again. When others try to flirt with you, let your partner know repeatedly that it's all about them—unless you're in the mood for a major row. Double-check that recent aspiration. Is that really who you are, or will it be a chore to carry it through? There is beauty, calm, and balance to be found in a steady friend.

“Something unwanted has recently resurfaced from the past, but it is on its way out now, never to return.”

Capricorn (Dec 22 - Jan 19)

As Saturn reaches the end of a long journey through your sign, now is the time to tie up loose ends and

see a project through to the conclusion. Your love life has taken a back seat to all the other activities in your world recently, but this was always temporary. Friends, family and even a new flame will assume more important roles as this key planetary transition takes place. An irresistible urge to reinvent yourself must be heeded, for only a new you can successfully navigate the new terrain in which you find yourself. Don't be afraid to try something totally different and foreign to you. Comfort zones are made to be stretched.

Aquarius (Jan 20 - Feb 18)

You've got a lot of get-up-and-go in your stars this month, but the supply is not endless. You'll have to

make a conscious effort to keep your promises within practical limits, lest you find yourself unable to deliver. The people who count on you will surely agree that exceeded expectations are better than failed ones! A love interest takes on mystical, hidden flavours—an intriguing situation to say the least. If you're already committed, add a little mystery to your behaviour and keep your partner guessing—it will drive them wild and keep them wanting more. After the 17th, you find yourself with a new inner resolve.

Pisces (Feb 19 - Mar 20)

If you had to choose between the sentiments of the past and the possibilities of the future,

what would it be? Fortunately you don't have to make such a hard choice in absolute terms, yet drifting across the ocean of memory can prevent you from riding the wave of who you are now. Where love is concerned, your partner needs you to reflect their light and celebrate their recent accomplishments. The psychic turmoil of the past month has kept you tied up, maybe even a little preoccupied. It's time to let others know that you are behind them all the way. When it's time to return the favour, you'll be glad you did!

Spiritual Intimacy

barney battles

Life can take its toll on any relationship. Stress, financial worries and the pressures of bringing up children can all conspire to drive a wedge between even the happiest of couples. The first signs of problems can manifest themselves in the **bedroom**—one partner may be too tired for intimacy, or two partners may find that they are not going to bed at the same time—they may even be avoiding intimate contact. Once a rut like this has begun, it is very important to climb out of it. In order to do that, it must be understood that lack of intimacy is a physical symptom of distress on a higher, spiritual level.

In our world, great importance is attached to intimacy. It makes us feel wanted and needed, and is a great release for all the stresses and tensions of the day. But it could be that **too much importance** is placed on the physical side of a relationship. Lack of intimacy is a sign that partners are becoming spiritually isolated, and this is more difficult to heal.

Spiritual isolation is more common than you might think. With so much of our daily lives revolving around computers and technology, it is all too easy to withdraw from human contact. The television replaces conversation, the Internet replaces social life, and before they know what happened, couples can find themselves living separate lives under the same roof.

In order to establish contact on a spiritual level, both parties must set aside their physical desires and concentrate on rebuilding the **ethereal bond** that brought them together in the first place. While this may sound complicated, it can be achieved in simple ways, such as talking about problems that have arisen. During these discussions, it is important that each party has the opportunity to hear and be heard. Through the simple act of talking, the couple might come to realise they are not as isolated as they first felt.

It is worth taking time away from computers and technology, because while these things do make our lives easier, they can also intrude upon them. Couples that set aside time for each other, away from the distractions of modern life, are far more likely to achieve a balanced relationship, both physically and spiritually. This needn't involve expensive restaurants or nights on the town (although such things usually don't hurt!). More can be achieved by simply taking a walk together in tranquil surroundings.

Sexual intimacy is a major factor of any relationship, but it is only a physical way of expressing higher feelings. Spiritual intimacy is often referred to as 'the forgotten intimacy'. Sometimes it's easy to forget that there are other aspects to a person than just their bodily form. Were we to pay as much attention to seeking spiritual forms of intimacy as we do physical forms, we might see more marriages standing the test of time.

In need of **inspiration** or **guidance**?

Cosmic

Ordering

Do you ever find that when you expect things to go wrong, they often do? Or do you experience coincidences, thinking of something and then seeing it happen? This is often described as the process of cosmic ordering, and even mainstream science is beginning to indicate that it happens to us all the time, even when we aren't aware. But what if you could channel this power? Would you be able to consciously control your future?

The basic premise of cosmic ordering is that the universe is willing to give you everything that you want in life. You can place an order with the universe and wait for it to manifest. This happens due to an energy field known variably as the "field of intent" or "quantum field," an invisible dimension where our Spirit connects to the whole of the universe and returns our conscious desires. As a spiritual practice it is becoming more popular, with even celebrities jumping on board and claiming they owe their success to cosmic ordering.

How can you make it work?

Linking to the field of intent requires the power of intention—a combination of desire and faith—to create a new situation. When the power of intention is properly used, your Spirit connects to the field of intent and grants your request.

It is crucial to feel that you deserve what you are asking for. Desiring something while feeling you don't really deserve it will not work—there is a gap between what you want and what you feel you deserve. However much you want something, it can't manifest unless you really feel worthy.

Making your request

There are different ways to place your order. You can go to a sacred place, wear different outfits, or carry

certain artifacts. Some suggest that cosmic ordering works in any setting that feels right to you. We find that it's best to be somewhere quiet, and it's also helpful to write down your request. The rest is up to your intent, focus, and power of intention.

Are there any risks?

If cosmic ordering is one of the easiest and most effective ways of getting what you want in life, the question naturally arises: Can it backfire and cause negative intentions to manifest? Sometimes we self-sabotage, or think negative thoughts about ourselves and others, and these orders may also be filled if intention is present. As the saying goes, whether you believe you can or you believe you can't, you are probably right. This is one of the keys to cosmic ordering, because even negativity can be manifested. So use your newly acquired knowledge for the good of all, and you will begin to experience more positive outcomes in your own life.

Are You Ready to Order?

- **Write down a goal that you desire, deserve and believe in**
- **Go somewhere quiet**
- **Repeat the goal to yourself and see it in your mind's eye**
- **Feel what you will feel when you have achieved the goal**
- **Stay in the zone for several minutes**
- **Repeat daily until you notice your life changing. The change may be sudden or gradual, but you will recognise it!**

WHAT MAKES A GOOD READING?

Around the age of 6, I started to feel very different from everyone else. I could sense beings around me, and I could sense if someone's energy was positive or negative. I would say I was about 8 years old before I could 'see' things that were not usually visible in this dimension, and was able to communicate with spirits.

WHEN DID YOU FIRST REALISE YOU WERE PSYCHIC?

I have always had a connection to the psychic world, even as a child. I first realised that I could pick up on things intuitively when people would start to tell a story and I would know the outcome before they told me, I thought that everybody could do this until I later realised that it was a gift. I always had a strong intuition, which I have developed over the years.

TELL US ABOUT A MEMORABLE EXPERIENCE WITH A CLIENT.

I always have lovely experiences when I read for clients. I love connecting with the clients and their guides, and I always feel very privileged to be able to do that. There is one that does stick out more than others. This client was about to go through a massive spiritual awakening. The person was entering a very high vibration, which they were already aware of. To see such an amazing thing happen was incredible!
