# Planetary highlights for the year ahead

*It's the two heavyweight planets Jupiter and Saturn who are providing most of the action throughout the year. Here are their key dates which should result in some noticeable shifts and changes in everyone's lives. Saturn opposes enigmatic Neptune on 28 February and then again on 25 June: nothing is really quite as it seems. Godfather planet Jupiter cosies up to hard working Saturn on 16 March and then again on 6 May: expect progress in all ventures. More problematic is when Jupiter squares up to eccentric and unpredictable Uranus. Key dates for this are 11 May and 9 October: goalposts are liable to change. Saturn moves into Virgo on 2 September emphasising hard work and a healthier approach to life. Jupiter in harmony with Neptune on 30 October heralds a rather more peaceful and good-natured mood. Jupiter is in conjunction with dark and powerful Pluto on 11 December – expect fireworks all round. Finally, here are the eclipse dates for 2007: these often symbolise intense periods that can lead to sudden breakthroughs and a dramatic turnaround to events. The two lunar eclipses are on 3 March (in Virgo) and 28 August (in Pisces). The two solar eclipses are on 19 March (in Pisces) and 11 September (in Virgo).*

**Aries**

Mar 21 - Apr 20

Working hard and playing hard is what the coming year is about for you. Take advantage of lucky Jupiter's influence allowing you to let your hair down and enjoy life. You should find that you are more able to rise above petty concerns and problems. Make the most of dynamic Mars in your sign from 15 May to 23 June. Your faith and belief system becomes important as the year progresses and you might even consider furthering your education.

It's a year for big changes and new directions. Good sense planet, Saturn ensures that there's nothing careless or impractical about your creative ideas. You will know what you want and how to get there, especially on 30 June when the Full Moon lights up your career chart. There's the possibility of a job offer abroad in August. And by September you'll feel happier with the way things are moving at work. Your mind will be open to fresh ideas and you will carry the insights you gain now forever.

You'll start the year with a bit of a cash crisis but the good news is that extra cash should be coming your way in May and June – but only if you make the effort to put yourself out there. From 24 June onwards money troubles ease considerably.

If your partner is prepared to give you some space it'll be fine. If they aren't then they will be out of your life in a flash. Sexy Mars makes your fantasies come true in May and by the summer you should be feeling closer than ever to someone special. Emotional honesty is the key to making a success of it. Venus visits your sign from 21 February until 17 March. This is the best time to make an impression: strike while the iron is hot.

**Taurus**

Apr 21 - May 21

Life is very much what you make it this year. This is true of every year, but in 2007, it is easier to do what you want without the distractions of intense lessons from outer planets. Any type of in-depth study or research is likely to go well. You may be stripping some things away – perhaps even downsizing – and adding structure to your domestic life. Saturn will help you sort out your living situation in July. Avoid any major decisions in October.

February brings a great opportunity to show off your vision and creativity. Around 30 June others may not be seeing you for who you are but rather what they'd like you to be. Try not to encourage this behaviour, as tempting as it might be to do so. From September through to the end of the year, you benefit from Saturn's influence. A stronger sense of stability enters your life, making you feel especially secure and solid.

An insurance settlement or an inheritance could come your way, and this is an excellent year to work on financial planning and strategy. Benefit can come through jointly held resources on 6 May. If you are looking for financial support or backing then mid-August to mid-December are the best times.

This is a time of increased psychological understanding, intimacy, and trust but you won't want to be caught in a rut. You will be drawn to people who are free-spirited and relationships that are stodgy or limiting may very well be left behind. Lovely Venus in your sign from 18 March to 12 April brings plenty of romantic overtures. The eclipses in March and September will test the strength of a current relationship or bring singles a brand new romantic interest.

## Gemini

May 22 - Jun 22

This year brings a desire to structure your time and effort and cut out the dead wood. You could find such things as errands, bureaucracy and day to day chores rather overwhelming. From 7 August to 10 September your life should pick up pace considerably: this is the time to go after what you want. By the autumn you will have gained a greater depth of understanding through this focused approach.

 You may find yourself taking on the role of a consultant or advisor, or you could benefit through the help of such people. Good publicity is likely to come your way on 5 March. If your work takes you before the public, you can safely expect popularity. In March and April you may feel pressure to produce ideas and to make them work but by September that pressure will ease as bosses decide to let you express yourself in your own style.

 You can negotiate more successfully than ever, and, if applicable, win in legal matters. Financial benefits could possibly come through partnerships. From September onwards a family or property matter will require a lot of attention. The stars predict a windfall in December – just in time for Christmas..

 This is a year when you are more likely to establish or solidify a significant partnership. The very best time for you to enhance or attract a long-term relationship occurs with Jupiter's help from January through to March, and then mid-August to mid-December. A relationship begun in mid-March could be one that revolves around learning, communication, and shared mental interests. Venus travelling through your sign between 13 April and 8 May gives you the chance to make things right with someone special.

## Cancer

Jun 23 - Jul 23

An easygoing year for the most part with Jupiter offering you a sense of physical well-being and more joy in your life. Friendships will change with some old friends moving on and new people coming into your life. It's all good though, even if you find it tough at first. You'll learn some important lessons in letting go in June and the early summer will be full of new faces and places.

 You find more enjoyment in the work you do, and it is easier than usual to find employment especially on 21 March. Your ability to handle the details required to do a good job is significantly enhanced and others become much more aware of your skills in August. From September to December your work life stabilizes dramatically. You feel on top of your game – secure, modestly confident, and willing to tackle whatever comes your way.

 Saturn continues to hold you accountable for your personal finances, urging you to save for a rainy day. Financial success may not be remarkable, yet it is generally steady if slow to come by. In July and August, measurable progress can be made with your personal finances.

 Intimate relationships can be highly colourful, perhaps with spiritual undercurrents, but also a little confusing. The boundaries that are normally drawn between what is yours and what belongs to others may be blurred somewhat this year. A partner could have unsettled finances, and this could impact on your own finances. The period between 9 May and 5 June, when Venus is in your sign, brings plenty of romantic opportunities. If you're attached you may be ready to marry at the end of the year. For singles, November brings the chance to meet someone new.

## Leo

Jul 24 - Aug 23

This is a year of inspiration, promising an expressive and creative time ahead. Relationships with your children may be especially fulfilling and pregnancy or childbirth may occur during this period. This is a fabulous time in which to take the holiday you've always wanted to take. From September onwards you should feel a change in the air when Saturn finally leaves your sign and moves on.

 By putting in the leg work in March and April, you'll get your colleagues' and boss's respect. Creative projects are likely to fare well, and could possibly even bring some type of recognition or reward. You continue to discover exactly what you are capable of doing, without the rose-coloured glasses. You see your limitations now, but also your capabilities, in a realistic manner. If you can take the plunge on 3 May, a new job could be a lot of fun and hold much better long-term prospects.

 The lunar eclipse on 3 March in the money angle of your chart means it's time to get organised financially and pay off credit-card debts. Healthy risks are likely to pay off, but be careful of overconfidence in speculative investments. September through to the end of 2007 brings consolidation to all your finances.

 If unattached, you might find that the prospect of partnership is elusive. You may be unsure exactly what you want from others as you explore your own issues and attempt to define yourself more clearly as a separate, independent individual. You are doubly lucky this year because love planet Venus boosts your romantic prospects not once but twice. She visits your sign from 6 June to 14 July and then again from 10 August to 7 October. Make the most of her blessings during these periods.

## Virgo

Aug 24 - Sep 23

The emphasis is on family life and close personal relationships. Great enjoyment can be found in your domestic life and it's time to expand your living conditions on both an emotional and physical level. The big news is Saturn's entry into your sign on 2 September. The things that simply aren't working for you will become glaringly obvious in the last four months of the year: simple and basic should be your motto.

 Until September, you tend to take less interest in more worldly ambitions and activities, after which success does very much come into play. Your sense of timing and balance is superb now, and your efficiency is improved ten times over. Others may turn to you for advice or recognise your experience in a particular area of life. Confusion over training issues are possible on 13 August. Anything that requires focus and commitment will be of benefit.

 Joint finances are strong in February so it's time to sort out once and for all exactly who is paying for what. Opportunities to buy or sell property for financial gain will present themselves throughout the year. You may have had to sacrifice quite a lot in the past but now you will receive your due.

 The eclipses in March and September spotlight relationships and the strength and relevance of all your ties will be sorely tested. Any potential romantic partners will tend to see you in a favourable light and are attracted to your ability to tend to practical matters while also keeping your eye on the future. Venus blesses you with two visits to your sign this year. Firstly from 15 July to 9 August and then again from 8 October to 8 November: use this time to get your heart and head working in unison.

## Libra

Sep 24 - Oct 23

Learning, work, and romance figure prominently in your year ahead. Educational and communication opportunities are likely to present themselves. Some sort of positive news or announcement is likely to be part of the picture particularly from March to May. Travel opportunities will enrich your life in April. How you fit in with others and your affiliations with people and groups become serious matters in your eyes in early July.

 During the first half of the year, you may be dealing with some form of information overload but, despite that, career matters should flourish. Opportunities for frequent short business trips may present themselves in March. This is a good time to take a course, to reach out to others, and to grab the attention of an audience as your talent for communication really blossoms. In August don't let your social life distract you from accomplishing a long-held goal that can only be achieved by having quiet time.

 Caution with gambling is necessary this year. From 7 to 9 March is a time when social connections are hugely influential in bringing you an unexpected windfall. Useful advice from a family member could prove lucky financially in June. The link between psychic dreams and money becomes apparent on 25 August.

 You are highly romantic but also prone to self-deception. Love looks very romantic at the end of March: the only word of caution is that you might attach yourself to someone who you deem needs 'saving'. Communication with a romantic partner or with your children is likely to be especially rewarding particularly in October and November. From 9 November to 5 December Venus is in your sign bringing happiness and harmony to affairs of the heart.

## Scorpio

Oct 24 - Nov 22

You will be in a wonderfully creative mood and original ideas will come to you easily with March and September being particularly highlighted. One of the key elements of success this year involves humbling yourself to the advice of older persons or authority figures, particularly in May. These people are likely to help you further your goals, so remember to listen and take out of it what works for you.

 You should find that you are moving towards working at things that you truly enjoy and that draw upon your natural talents. From 24 June onwards you will be willing to invest in yourself and in the people around you. The career angle of your chart is particularly well starred in July and August. Making money is no longer enough, you want a job that helps you be ethical too. Results may not be immediate, but they will surely arrive down the road. Projects begun now can have long-term benefits.

 For most of the year you will be making spectacular financial progress while Jupiter moves through your money house until mid-December. During this period, you are likely to see benefits to your earning power and value system. Your personal finances come into focus, and nice developments regarding your earning power are in store. Monetary problems from the past should clear up.

 Excitement in your romantic and social life may distract you from increasing your earning power. You love being the one in charge, which means you can be a bit of a game-player. But truly falling in love involves a willingness to be vulnerable. Toss out your rule book in March and see what happens. Venus in your sign brings thrills and a few magical moments between 6 December and 30 December.

## Sagittarius

Nov 23 - Dec 21

It's a relaxed, fortunate and hopeful time ahead for you.

Those around you may comment on your exuberance and enthusiasm: your natural optimism and generosity are really showing themselves. What happened in the past is not very important to you now – it's the future you have your eye on. Your major desire is to expand your personal horizons, but some obligations to family or insecurities arising from disruptions on the home front interfere at times with that desire, particularly in the first half of the year.

 You are reaching a professional peak in 2007. At times, you may feel like the sky is the limit but be careful that a carefree attitude doesn't end up a careless one on 11 May. In September, Saturn moves into your career zone and this is a time when you could feel quite a bit of pressure. Suddenly, you find yourself under a magnifying glass. What have you done with your life? You can learn about your limitations at this time, which, ironically, offers you more freedom in the long run.

 Dynamic Mars moves into the money angle of your chart on 17 January. Exciting changes on the domestic front on 19 March bring the opportunity to completely transform your living space. Luck is on your side if you are thinking of starting up a new business or asking for a pay rise.

 You value freedom and can find yourself avoiding long term relationships. But be open to finding the unique friendship you want: it could happen when Mercury moves into the relationship angle of your chart on 11 May. This summer you can look forward to a romance in a faraway place. Venus enters your sign on 30 December just in time for some New Year's Eve romance.

## Capricorn

Dec 22 - Jan 20

While much of the year is relatively quiet, the last few months of 2007 pack a punch. Determination to go after what you want is backed by an increasing feeling of hope, optimism, and spiritual protection. By December, you're moving forward like never before. In the meantime, you'll be building your resources, getting your finances straightened out, and learning a great deal about the people around you. View this year as a planning year to set you up for a very successful 2008.

 Communications of all kinds look set to advance your career from 13 February to 15 February. No one can say that you don't work long and hard, but sometimes the rest of your life suffers. Make this the year you have a life outside work – it'll actually pay off in the long run. Activities that take place 'behind the scenes' are especially beneficial. Work that involves serving others could begin in May and bring you much enjoyment.

 Charity, giving anonymously, volunteering, and helping others without expectation of reward will be the most satisfying way to feel your money working for you. Imaginative undertakings could boost your income in June. Working on a project in solitude or behind the scenes could prove quite profitable.

 A special person is likely to take over your thoughts and you could even become slightly obsessed. Luckily you should be able to relax and shift your focus and find the situation resolves itself from March onwards. Several love paths open up for you in the spring, including one you thought was closed to you and one you should really not venture down. Venus transits your marriage chart from 9 May to 5 June and brings romantic adventures for singles.

## Aquarius

Jan 21 - Feb 19

Mars in your sign from 26 February means there are no limits to what you can achieve.

Friendships play an important role in your life, and could help further your own personal goals as well. Saturn continues to test the strength of your closest relationships. Some may collapse under the strain but those that matter will become stronger. You should receive a boost of good fortune from Lady Luck Venus in June and September.

 Your long-term goals and wishes tend to be broad and perhaps unusual or ahead of the times, and you take great joy in dreaming up ideas for the future. You're a team player – but this can mean your individual contribution goes unrecognised by your boss in early July. Make this the year you blow your own trumpet more over your successes.

 The solar eclipse on 19 March means finances need to be bullet proof. Income from a business is likely to figure prominently in July and you have the opportunity to increase the profits. Saturn begins a two year journey through your financial sector in September. This should enable you to learn to negotiate effectively and to invest the funds at your disposal wisely.

 Issues surrounding compromise, flexibility, and the ability to give your heart to your partner will surface now. Initial frustration that began for you in mid-2005, may have taken the form of feeling criticised and 'examined' in close relationships. By the end of the year, you will have learned much about commitment and compromise. When Venus visits your partnership zone from 6 June to 14 July and then again from 10 August to 7 October close relationships are highlighted.

## Pisces

Feb 20 - Mar 20

Your career, reputation, and public life are influenced by Jupiter, planet of good fortune and abundance and your worldly status is likely to change for the better. You could find yourself propelled into the limelight in a positive fashion. The eclipses on 19 March and 28 August bring out long standing issues that need resolving. The very best times occur at the end of October and mid-December.

 From January through to March and then mid-August through to mid-December you may encounter some challenges between your personal goals and the demands of your career. An event that occurs around 6 May expands your career or professional interests, and you derive more pleasure than usual from a special project. Integrity and honesty will get you everywhere and the more willing you are to put yourself in the limelight, the more positive the rewards – this is not the time to be a shrinking violet!

 Mars moves into your sign on 6 April and your financial instincts have never been better. You may feel like undertaking major works on your daily living space in May so saving up now may be a good idea.

 The urge is for you to stay realistic in all your relationships. If you hope to build a life with a partner, that person will have to demonstrate that they can be your equal. Saturn will show you that it is not acceptable for partners to take advantage of your good nature. March is a good time to get bold and tell someone special how you really feel about them. Venus in your partnership zone from 15 July to 9 August and then again from 8 October to 8 November means you have a double helping of romantic opportunities.
