Your Stars for 2008

by Pat Blackett

How Jupiter and Pluto will affect you in 2008

This year the combination of both Jupiter – planet of expansion – and Pluto – planet of transformation – in ambitious Capricorn will bring their influence to bear on all of us. However, their effects will be felt differently by each sign because the areas of life that are affected will vary considerably depending on what zone they fall into.

For astrologers, there are twelve zones in the chart; these are called 'houses'. Here is a brief outline of what to expect from this powerful planetary combination in your particular 'house'.

Aries Experiences will be intensified in your Tenth House of career and worldly ambition. The desire for greater recognition and the impetus to push forward will be strong. You will also be reminded that every gift has its price.

Taurus Travel and wisdom are the areas put under the spotlight as your Ninth House of higher learning and long distance journeys is emphasised. Expect a transformation in your beliefs: the way that you reach decisions and act on them may have to be reviewed.

Gemini It's important to be clear about your goals in partnership as your Eighth House of intimacy and shared resources comes into focus. You will reap emotional and material rewards by joining forces with others and will learn the lessons of true commitment.

Cancer With the emphasis on your Seventh House of relationships you must become more open to those around you and widen your horizons. Optimistic people surround you and you will be confronted by the need for change: emotional growth will follow on from this.

Leo Your Sixth House of work and health is highlighted. Good fortune is earned through your own direct efforts at work. Be clear about your intentions. A commitment to improving the wellbeing and environment for both yourself and those closest to you becomes important.

Virgo You always have a commitment to perfection and this year you can bring your talents to bear in your Fifth House of self expression, creativity and children. The desire to be involved in something meaningful will help you to break through any creative blocks that have held you back in the past.

Libra This is a good year for domestic growth as your Fourth House of home and family is highlighted. Spend time and energy towards improving your living space. Your attention may turn to family history and a growing understanding of where you came from can help you to decide where you want to go next.

Scorpio It's time to re-evaluate the way you think and what you spend your time thinking about when your Third House of communication and intellectual interests is emphasised. This is a positive area of life for you: if you have teaching or writing ability this is the year to launch out and spread your wings.

Sagittarius It's a transitional year and a time to build on what you have already created as your Second House of self worth and material wealth is transited. You will not be put off by the challenges that present themselves and begin to see the world from a more realistic and down to earth viewpoint.

Capricorn Planets in your sign and therefore your First House bring significant personal growth. This period of self scrutiny will provide a deeper understanding of your motivations. Letting go will be essential in many areas of life. Change is inevitable and for once you can welcome it with open arms.

Aquarius Behind the scenes activity is strong with your Twelfth House of seclusion and mystery being emphasised. Growth and changes happen to you in a way not apparent to others. Take time to tend to your inner life and by so doing heal old wounds and reassess your life purpose.

Pisces You will have a higher dependence on those around you while your Eleventh House of groups and social conscience is highlighted. Your ability to network is strengthened and your circle of friends is bound to expand but it's important to concentrate on the quality of relationships rather than quantity.

Planetary highlights for the year ahead

Optimistic Jupiter continues his stay in industrious Capricorn throughout the

year. This is a time to set goals, plan courses of action, and by using well thought out strategies reach the summit of success.

Opportunities will be greatest for those who have done their homework. Saturn, the planet of boundaries and limitations is in detail-oriented Virgo as we learn how to perfect our skills, cut waste and develop healthier habits.

Environmental issues grow in importance as we scrutinise our relationship with the world around us. Jupiter and Saturn form three harmonious trines that will help us discover a balance between being compassionate and setting limits.

Key dates to look out for are 21 January, 8 September and 21 November: it should be easier to connect ambitions with reality around these dates by establishing well defined goals and having the confidence and level headedness to achieve them.

Revolutionary Uranus in Pisces is breaking down the barriers of illusion

and waking us up to what's happening all around us. We learn the lesson that even one person can make powerful changes which can influence the globe.

Spiritual Neptune in intellectual Aquarius makes for an unusual combination which can be rather disorienting to some.

Powerful Pluto enters politically astute Capricorn on 25 January until 13 June. He will back into Sagittarius for a few months and then return to Capricorn on 26 November where he will remain until March 2023. This marks a major change in society and we can expect that his visit to earthy Capricorn will alter the significant structures that support our culture and that issues of dealing with our wasteful ways will require radical new thinking.

Eclipses often symbolise intense periods that bring drama and self doubt but also sudden breakthroughs to situations that have reached stalemate.

The first eclipse of the year is a Solar eclipse on 7 February in the humane and politically minded sign of Aquarius. This is followed by a Lunar eclipse in careful and pragmatic Virgo on 21 February. Later in the year there is a Solar eclipse in glamorous and dramatic Leo on 1 August and finally a Lunar eclipse in Aquarius on 16 August.

Aries

Mar 21 - Apr 20

Your widened mental capacities are going to gain you practical and concrete results. It's a year to plan for the long term but patience is a necessity in April. You can reach the heights, with September being particularly well starred. You may find yourself saddled with more responsibility than usual but the more you accomplish the more support you will receive. Do try to set your own goals rather than trying to meet those established by someone else on 14 October.

 It's a year for big changes and new directions. Good sense planet, Saturn ensures that there's nothing careless or impractical about your creative ideas. You will know what you want and how to get there, especially on 30 June when the Full Moon lights up your career chart. There's the possibility of a job offer abroad in August. And by September you'll feel happier with the way things are moving at work. Your mind will be open to fresh ideas and you will carry the insights you gain now forever.

 Status and career will occupy your focus rather than finances. Of course you will earn money but it's likely to maintain a status quo particularly in April and May. On 30 April do something because you love it rather than pursuing money for its own sake. October is a good month to make a shrewd investment.

 Venus visits your sign from 6 April until 29 April which is when your romantic quota soars. You have the freedom to create your love life as you would like it to be this year and the pressure is off. The real action is in the area of friendship: new and very interesting friends are coming into the picture. If you're looking for love then August is another peak time to go out there and find it. There's a very special shared romantic moment on 11 September.

Taurus

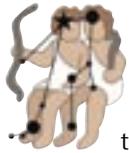

Apr 21 - May 21

You feel compelled to work and live in ways that are more in line with your belief system which attracts opportunities and people who can help you. May is the month to reconsider goals you have previously set aside with 5 May being particularly significant. There's a major challenge in July when dealing with children. Your emotional security depends upon having your basic needs met and you will find it easier to satisfy your material desires, particularly in September.

 Expect career shake ups in February with a repeat showing in August. If you work in a creative field then you will reap the benefits of your hard work. An opportunity to integrate spiritual values with a worldly area of work presents itself on 26 May. Your networking abilities are strong: you can advance your career by joining clubs and professional organisations. You will be given the opportunity to find something that provides the creative outlet you crave in December.

 Stay within your limits: caution pays off, particularly towards the end of March. It's important to find the best balance between growth and consolidation. June is well starred for money, particularly 7 June. The second half of October and first half of November are good times to make profitable investments.

 Be ready to make that special commitment in April. With Venus in your sign from 30 April to 23 May your love quota increases. Do whatever you can to create harmony in your relationships in early September: efforts made now have a lasting impact. If you are married your partner's interests are set to shift to a more intellectual level and good communication will be essential. A trip to somewhere exotic will do a lot to enhance romance in October.

Gemini

May 22 - Jun 22

There are some family burdens to carry but your deepening communication skills win through. Late May gives you the opportunity to reflect on how you have reached this stage in your life and look at your personal history enabling you to establish a stronger and more solid foundation. How to be secure amidst all the instability is an important lesson to learn on 3 June. You have the chance to turn the course of your life in a more fulfilling direction in June and July.

 Change and experimentation seem the order of the day particularly throughout March. You like things to be fluid and dynamic and shifting gears quickly will allow you to grab opportunities that other more cautious people will miss. Look out for inspired thinking on 21 May. Excitement and uncertainty in December make you question whether you are on the right track but as the year ends you will be sure in what direction you should be headed.

 You can increase your income through making clever alliances. A joint venture with an experienced and sensible partner could prove very rewarding on 22 April. If you take your time and work steadily there's the opportunity to make more money in July. A significant long term shift in your economic future starts in November.

 A transitional year ahead with relationships under scrutiny. You'll be more aware than ever of sexual chemistry. Venus in your sign from 24 May to 17 June brings double the fun. Shared goals are important on 18 June. From August onwards there are some unexpected changes to romance with the possibility of connecting with someone new and exciting. Romantic opportunities crop up in unusual places in September and October.

Cancer

Jun 23 - Jul 23

Common sense is your weapon against disappointment in March. Reaching your goals is easy particularly if you can organise your thoughts clearly and present them well to others. Deciding how to make better use of your time on 24 April helps you to progress. The start of a complete transformation in your attitudes towards love and friendship begins on 3 July. Confusion can create problems in August and unrealistic promises could be made around this time.

 Plans go slowly forcing you to finish old business before moving on in March. Focus on long term goals: don't allow yourself to get distracted by others and their advice in April. Seek out professional advancement and recognition from within your own social circle. A 'big idea' could capture your imagination on 1 December. There is a danger of resting on your laurels later in the year: others could take advantage if you become too complacent.

 Now you are more in control of your finances there is no need to make dramatic changes: beware misreading a situation in February. Joint ventures prove lucrative and successful, especially on 21 May. Unexpected changes in your financial conditions are highlighted for 1 August. Your access to outside money increases in December.

 There's a strong connection between health and love in May. The smoothest period for romance occurs between 18 June and 11 July when Venus visits your sign. Someone stable and sensible proves attractive but an eccentric outsider adds to the mix on 13 November. Memories of emotional hurt in December tempt you to stay hidden but the greatest growth will come by overcoming your fears and jumping into love with open arms.

Leo

Jul 24 - Aug 23

Your challenge this year is to inject joy into the humdrum tasks of everyday life: don't squander precious time. Good fortune is earned through your own efforts in May: commitment is the key to success. There are sudden and abrupt changes to relationships in February and August: close friendships are put under pressure due to incompatible viewpoints. The lesson learned should be that it's important to respect individuality in others, especially on 16 August.

 The course of your professional future is in the balance and your strength lies in developing unconventional areas of expertise. In April, furthering your education is a solid investment. May is the month that gives you the chance to launch a new business or change job and 5 May sees new beginnings and opportunities come your way. Look for openings in the arts, music or creative projects. November sees the culmination to one particular project.

 The consequences of irresponsible spending become evident on 3 May: once addressed finances can be placed on a firmer footing. A more realistic approach will have to be developed in July and a sense of satisfaction comes from knowing you have earned your pleasures. In August there's a need to develop a long term financial strategy.

 Two eclipses in your house of relationships on 7 February and 16 August represent a change of attitude or even partner. It's time to wake up to the reality of your present situation and stop living on hopes and fantasies. Love comes out of the blue in March but this romance may be short lived. Venus in your sign from 12 July to 5 August means good times ahead in affairs of the heart. December stars bring opportunities to let your hair down and show everyone how truly fabulous you are.

Virgo

Aug 24 - Sep 23

Overall what the year has in store for you will be to your liking although it would seem that every time you try to settle into some pattern, it gets disrupted. Watch out for dramatic scenes on 21 February. Health improves in May. You will be able to create proper structures to all areas of your life in July. Your energy levels should be at their peak in August and new opportunities come your way to help you flex your creative muscles.

 The job situation seems rather unstable with a change of location as well as some close colleagues moving on. You would love to get out of the rut and try something new. The freelance life beckons from May to July although your professional life could frustrate you on 10 July. A colleague's mistake in June could give you the opportunity to show those who matter what you're made of. Perseverance wins through in August.

 A basic complacency takes over in March which means you could neglect your finances. Your need for financial security is intensified from April onwards, prompting you to work harder. Concentrated effort will pay off in September. Your relationship to money and personal possessions is likely to be transformed on 12 November.

 You often hold back when it comes to matters of love but you can't resist someone's capacity for laughter and romance on 8 March. Being more playful and relaxed will pave the way to new and exciting experiences. Others see you in a more romantic light in June and feeling more confident boosts your sex appeal. Special times are promised when Venus visits your sign from 6 August to 29 August. Your lesson in love this year is to learn that happiness is not necessarily linked to another person.

Libra

Sep 24 - Oct 23

Fulfilment comes through sharing fun times with close family. You will want to focus on the spiritual side of things as the year progresses particularly in May and June. Clearing out long-standing issues so that you can concentrate on a better future stands you in good stead on 10 July: adjustments need to be made to your attitudes towards health and work. Ask yourself what lesson you can learn from a friend's bad behaviour in August.

 Specialised training in areas you never thought possible brings rewards this year. The chance to shift to a more interesting field whets your appetite on 22 April. Maintaining positive communication with colleagues is vital in May. There is instability ahead but opportunities to expand your professional horizons should be seized in mid June. You will be most concerned with how much you enjoy going to work each day and the challenge this year is to find where that enjoyment lies.

 Your attitude to financial matters becomes a lot more conservative in April. A long term perspective will come into play from October onwards and you will want to save more for an exciting new venture. Shifts in your financial thinking, strategy and investments will mean improvements in your financial status by December.

 You're a romantic sign and can become disillusioned: adopting a more casual approach stands you in good stead in February and March. Expect romantic moments in the workplace where opportunities for relationships with people in power are highlighted. Look out for romance while exercising or in health orientated environments on 21 August. Venus visits your sign from 30 August to 23 September: make the most of romantic opportunities during this period.

Scorpio

Oct 24 - Nov 22

You have no problem viewing change as a challenge and will relish the excitement that comes your way. You will feel yourself steadily moving towards your desired goals in April. There's a distinct pattern to the year as themes return in subtly altered forms. When your ruler Mars visits your sign from 4 October to 15 November you have the power to achieve whatever you put your mind to. The New Moon on 28 October boosts your charisma.

 Working cooperatively with others is much more fruitful than venturing out on your own in July. Even so, your patience will be tested when you see that not everyone is pulling their weight: beware explosive situations on 1 August. You are capable of being refreshingly straightforward when communicating your ideas, no more so than in early August. Make sure you discuss your plans with others before making major decisions or you could find yourself out in the cold.

 Long term planning is the best way forward as in the short term money looks tight. Your interest in spending wanes in February and March. However, in late May you are likely to be splashing out on computers, cars and education. Throwing your money around just to impress is a real danger in October and November.

 It's a year of experimentation: you might even be tempted to make a list of different kinds of partners to try out! If you're single this is an exciting year with a series of relationships on the cards: April and May are particularly well starred. Caution is advised when meeting new people: don't rush things or you could end up disillusioned and regretful. Allowing things to develop over time brings romantic results particularly when Venus visits your sign from 24 September to 17 October.

Sagittarius

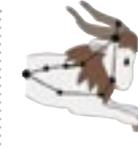

Nov 23 - Dec 21

Time to knuckle under and attend to more routine areas: it is in the detail that you can achieve your goals. New doors are opening up in May: the landscape looks unfamiliar but you will be thrilled by the lure of the unknown. Events on 7 June bring one relationship to its natural conclusion. Your enthusiastic and upbeat personality may have to be reigned in during November and December if you are to be taken seriously.

 You are going to have to work harder than ever to achieve your lofty objectives. You are thinking big but those around you are not on 26 July. Responsibilities at work can mean tensions at home. A change of ownership at work or a new boss is on the cards for August: stay flexible as you won't be able to control events. Links to government or some other official agencies are highlighted. Invest in yourself through education and training in September.

 Your money house is strong with an intense drive and interest in earning and spending. There is a rocky patch in April but you can easily weather that storm. Challenges excite you on 18 July and can lead to success. Older people and those in authority prove helpful to your plans in September.

 Love's on the back burner as you concentrate on following your ambitious dreams. Boredom is your enemy when it comes to relationships: good communication is the key. If this has been lacking then the stars in May and June should help you out. The Full Moon on 18 June is an opportunity for you to talk through any problems that have threatened one close relationship. If you have time for romance it is definitely out there, particularly from 18 October to 11 November when Venus visits your sign.

Capricorn

Dec 22 - Jan 20

Time to reflect on past patterns and how they can be changed: whatever you choose to focus on will bear fruit. Aim high and reach for the next level on 18 July. Foresight and common sense stand you in good stead with increased public recognition coming your way in September. Spiritual insights go deeper than practical breakthroughs in November: your personal philosophy needs some fine tuning to get it in line with external events.

 Studying independently without outside interference helps you advance in February. Combining common sense and dreams for the future produces the perfect balance. Your skill in getting the word out about what excites you is highlighted in August. New attitudes and new ways of thinking are well starred but do stay up to date with the latest technology. Charitable work seizes your imagination on 22 September.

 There are definite peaks and troughs in February and March: the test is to try to smooth out your earning. Set aside reserves to cover weaker months. It will prove difficult to make long term plans as you find it hard to predict what you will earn. Mixed messages on 16 August cloud your judgment.

 Friends seek you out so there's no need to go in search of companionship. Those around you will put your interests ahead of their own in June. Someone with strong family values catches your eye and the feeling is mutual. Financial differences could arise in August. Pressure on a current relationship will force it to grow. Don't seek to avoid complications by turning away: the long term benefits of facing things head on will be worth it. Love becomes easier when Venus visits your sign from 12 November to 6 December.

Aquarius

Jan 21 - Feb 19

Going against the grain is your theme this year and there is a part of you that enjoys the challenge of being tested and winning through. On 7 February you could find out that you don't know everything! In March it's important to remain open to what you can still learn, especially when it comes to relationships and the messy subject of emotions. Given a choice between change and stability it's wiser to choose the status quo in August even though this is not your natural instinct.

 You'll want to pursue spiritual goals and yet you have to earn your living. Struggles for power in May suggest that you will need to stand up for what you believe in. This is no easy task when you are matched by someone who is your equal. Your drive for success sees you through on 13 August: dreams turn into practical realities. Some original and bright ideas get you noticed in September: advancement can only follow but your sense of achievement is reward in itself.

 You have an interest and passion for money but not for its own sake: it's what you can do with it that interests you on 8 March. There's a fortunate trend in April but you won't be allowed to rest on your laurels. Tensions bubble up in August urging you to break free.

 Relationships have been stressful over the past two years and marriages have been severely tested but the worst is now over. Your playful side gains you admirers on 19 June. You will have the energy to go after your heart's desire in August: dive into intimacy and just see what happens. You are given two bites of the romantic cherry this year when Venus visits your sign from 17 February to 11 March and then once again from 7 December through into early January 2009.

Pisces

Feb 20 - Mar 20

You'll recognise themes from last year repeating themselves. You could find yourself shoved out of your comfort zone on 21 February enabling you to make breakthroughs you would not have otherwise achieved. You want change but are not sure what it is you actually want in March: freedom from obligation seems to be your main motivation. You will achieve great fulfilment through friendship and group activities in November.

 Last year your career underwent a subtle yet permanent change. Start taking creative risks: anything that forces you to be bolder and more outrageous is to be encouraged. You need to express yourself more fully and put more of your heart into your daily life. Starting your own business is a definite possibility in June as your desire to take on a leadership role becomes stronger. Separate professional issues from personal ones in November: watch out for an envious colleague on 12 November.

 Keeping up to date with changes in technology will bring financial advantages in March. Your most active and prosperous financial period will be in April. Legal documents may not be what they seem on 20 May so do get them checked out by someone in the know. A parental figure influences your spending.

 A partnership can move to the next level in February but this will depend on whether the relationship is answering your needs. Opportunities for love come your way when Venus moves through your sign from 12 March to 5 April. Your restlessness and desire for personal freedom won't help your partner feel secure in August. Duty may be an outdated concept but it has relevance to your situation. A friendship with someone older who wields power and authority attracts you.

Clairvoyant, clairaudient and clairsentient, Christine has worked as a trance medium and healer.
